EDUCATION

- **Manipal Institute of Technology, Manipal** Udupi, India
Bachelor of Technology - Computer and Communication Engineering 2022 -2026
CGPA: 7.1
Relevant Courses: Data Structures, Object Oriented Programming, Artificial Intelligence, Machine Learning, Cloud Technology, Operating Systems, Principles of Data Communication, Computer Networks and Protocols, Embedded System Design, Database Management Systems, Information Security, Foundations of IoT
- **Presidency School Bangalore South** Bangalore, India
Secured 9.2 CGPA in 10th and 8.94 CGPA in 12th PCMC. 2008-2022

SKILLS SUMMARY

- **Languages:** Python, C, Java, SQL, Android Studio
- **Tools and Frameworks:** Pandas, Numpy, Tensorflow, Keras, Matplotlib, Postman, Robotframework, Selenium, Git, Typer
- **Web development:** HTML-5, CSS-3, JavaScript
- **Operating System:** Windows, Linux

EXPERIENCE

- **Siemens Technology and Services Pvt. Ltd - Technical Intern:** May 2025 - August 2025
 - Worked as part of FT D AA IN DASS team, contributing to the testing of WinCC Unified Runtime Manager v4.0.0, a web-based industrial HMI (Human-Machine Interface) platform used for real-time visualization and control of factory automation systems.
 - Automated 50+ test cases for web UI features using Robot Framework and Python, gaining hands-on experience in web automation, Git and test-driven development.
 - Participated in Agile sprints, attended daily stand-ups, and collaborated with peers and co-interns to improve team communication and software quality.
 - Supported team members with debugging test cases and contributed to improving test coverage from 18% to 81%.

PROJECTS

- **SynesthAI - Music To Colour Visualizer (Python, TensorFlow/Keras, Librosa, NumPy):**
Developed a deep learning-based audio analysis system that predicts music mood by extracting segment-wise audio features and mapping them to HSV color representations by using a bi-directional LSTM model.
- **Clip-OCR - Hotkey Powered OCR Clipboard (Google Tesseract OCR Engine, pytesseract, PIL):**
Built a Python-powered desktop utility that integrates Google's Tesseract OCR engine with system clipboard automation using pytesseract. Designed a global hotkey trigger to capture images and extract text in real time, enhancing productivity by enabling seamless text reuse from screenshots and documents.
- **STierMix - Spotify Playlist Generator (HTML, CSS, JavaScript, Spotify Oauth):**
Developed an interactive web application using HTML, CSS, and JavaScript that enables users to create personalized Spotify playlists by inputting songs and receiving AI-driven recommendations. Integrated the Spotify API to automatically add playlists to user accounts, delivering an intuitive and user-friendly experience.
- **OpenSSH LIDS - Intrusion Detection System (Python):**
Designed and implemented a Python-based intrusion detection system for OpenSSH, analyzing Event Viewer logs to identify multiple failed login attempts. Integrated IP geolocation tracking to pinpoint and map potential intrusion sources, and automated real-time alerts to enhance system monitoring and accelerate response times.
- **Flick - Serverless File Transfer CLI(Python, Typer, socket):**
Built a serverless file transfer terminal application, Flick-CLI, using Python, Socket (TCP/UDP), Threading, Typer (for CLI), and Rich (for terminal UI). Designed a hub-PC model enabling seamless peer-to-peer file sharing of text, images, videos, and PDFs without external servers. Implemented efficient file handling with os and json modules, ensuring reliability and cross-platform compatibility.

EXTRA-CURRICULAR ACTIVITIES

- Coordinated the design, production, and distribution of certificates and prizes for TechTatva '23, the national-level technical fest of Manipal Institute of Technology, ensuring accurate and timely delivery by collaborating with team members and event organizers.
- Served as a Working Committee member of the Design domain at IECSE, the official Computer Science club of MIT, actively participating in workshops and talks to gain insights into web development
- Hobbies: Playing football, guitarist, and sketching.
